

TRAVELERBUDDY MAKES TRAVEL PLANNING EFFORTLESS DESPITE CURRENT PANDEMIC RESTRICTIONS

Singapore/Zurich, June 9, 2021. TravelerBuddy's new Travel Advice solution offers comprehensive support for the tourism industry keeping travelers informed, updated, and reassured at all times.

While there is certainly a pent-up desire to start travelling once again there is also, understandably, a lot of uncertainty and anxiety around the resumption of international travel. In-depth research and due diligence are a must but where do you begin?

TravelerBuddy with its new Travel Advice solution provides real-time information on the latest travel protocols for over 200 countries worldwide. Users can browse an interactive world map to quickly and easily check the latest situation with regards to entry, quarantine, covid tests, vaccinations, face masks and other essential details for their chosen destination or planned trip.

Companies and organizations that are active in the travel arena and would like to enhance their customer service offering can now have exclusive access to this easy-to-use solution. Travel Advice with all its relevant data can be integrated directly into an existing website giving clients the reassurance they need to start planning a trip.

The information provided by the application is compiled and consolidated from official sources, such as government authorities, health and tourism organizations. In addition to the desktop version, the feature will also be part of the multifunctional TravelerBuddy app.

Despite some positive signs that the global pandemic is slowing down, the tourism industry is facing the huge challenge of making travel for either leisure or business purposes appealing once more. TravelerBuddy's Travel Advice solution can take care of one crucial part of that challenge.
